Projects

YelpCamp — **July 2024 – Dec 2024**
Js,MongoDB, Express,Nodejs — *LiveDemo*

- My first full-stack web application. Fundamentally, it's review website for campsites. The main features are login, sign-up, Admin role, MapTiler API, and Create, Edit, Up date, Delete (CRUD) for campgrounds, comments, and reviews. Create routes have authentication. Edit, Update, and Delete routes have authentication and authorization. The basic foundation was built in the capstone project from the Udemy course The Web Developer Bootcamp

ProductStore Website — **Jan 2025 – Feb 2025**
React,MongoDB, Express,Nodejs — *LiveDemo*

- I developed a full-stack ProductStore website using the MERN stack (MongoDB, Express.js, React, Node.js). The application allows users to view available products, as well as add, edit, and update product details through a user-friendly interface. It features seamless frontend-backend integration, real-time updates, and efficient CRUD operations.

Amazon clone using — **Mar 2025 – Apr 2025**
HTML,CSS,JS — *LiveDemo*

- Developed an Amazon clone using basic HTML, CSS, and JavaScript to test and refine my front-end development skills. This project involved replicating the homepage lay- out, product listings, and interactive features such as a re- sponsive navigation bar and product grid.
